

Richardson Electrical Company Receives Vice President Gore's Hammer Award

They earned the award by developing and implementing an alternative plan for the discharge of waste water that will save the government an estimated 6 million dollars.

On July 25, 1999, Richardson Electrical Company, Seabrook, NH, a Southeastern New Hampshire electrical contractor announced that the company is one of the recipients of **Vice President Gore's Hammer Award**. This award gives special recognition to teams of Private Contractors and Federal Agencies that make a significant contribution in support of the National Partnership for Reinventing Government.

The award was given to the New England HTRW Program Team working at the Charles George Superfund site in Tyngsboro, MA. The team consisted of Roy F. Weston Inc., Methuen Construction CO., Richardson Electrical Company, the New England District Corp. of Engineers, CENAE and EPA Region I. They earned the award by developing and implementing an alternative plan for the discharge of waste water that will save the government an estimated 6 million dollars and provide future economic benefits to the Tyngsboro community.

As one of the leading contractors in the area, Richardson Electrical Company has a wide range of capabilities, from High Voltage construction to Commercial, Industrial and Institutional building projects, to water, Waste Water, Fueling Systems to Instrumentation Data and Communication systems, pumping stations and treatment plants to tank farms.

With more than 100 years of experience, Richardson Electrical Company provides services to Federal, State and Local Agencies as well as to Commercial and Industrial clients nationwide.

Our primary goals are on time, in budget, quality construction.
